1. Generate your codes on <http://qrexplere.com/generate/>.
2. Unzip the downloaded zip file to a directory of your choice.

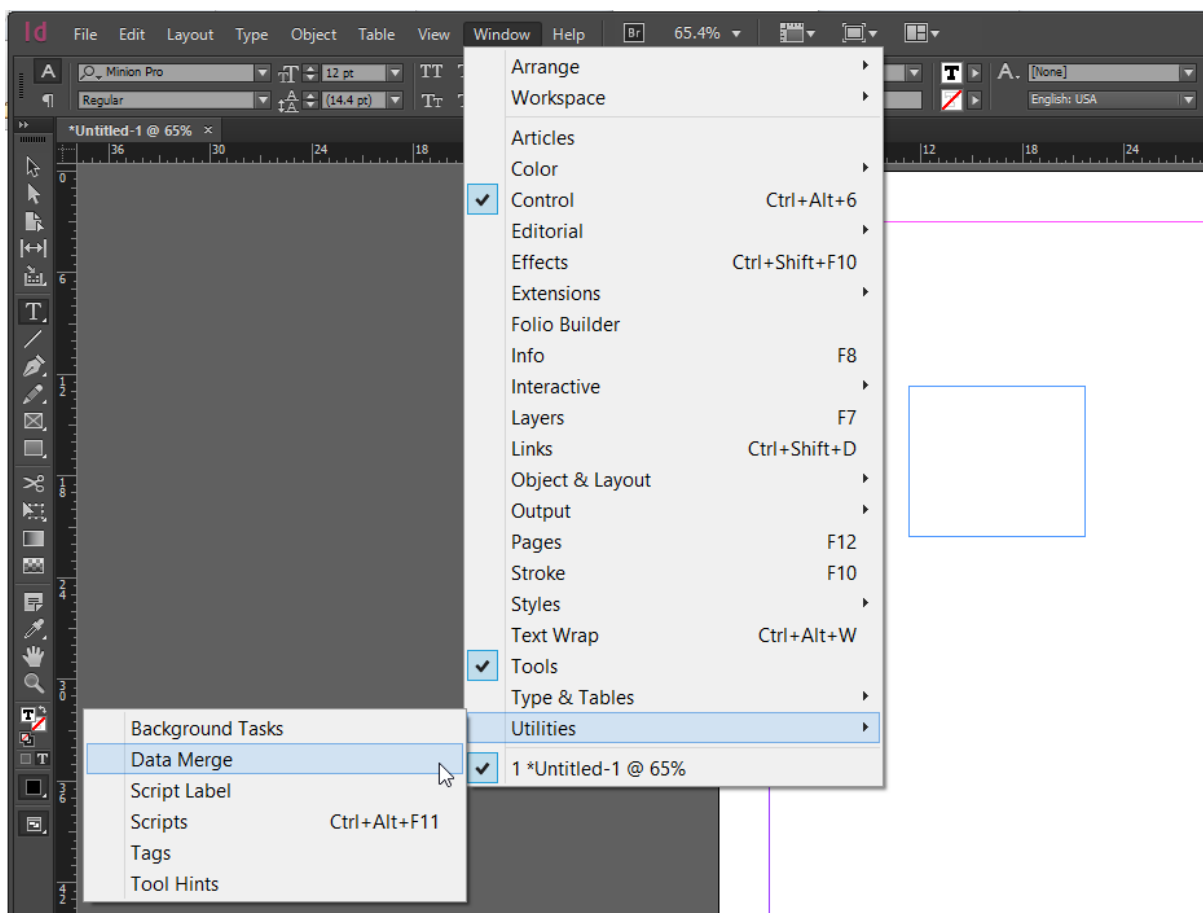

3. Open the `_generated_codes.csv` file and add an `@` symbol before "filename".

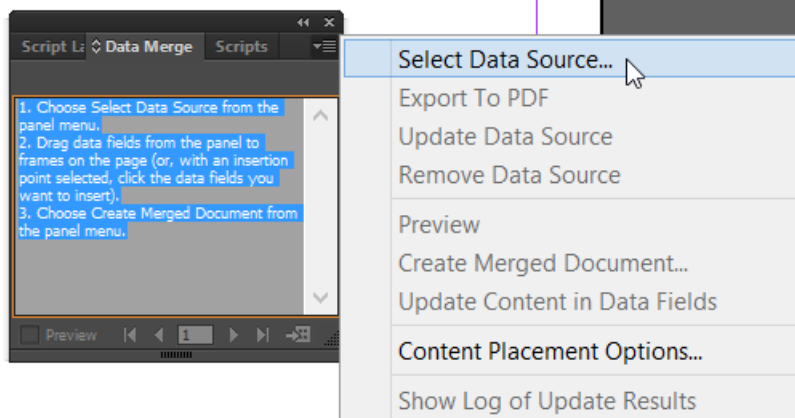

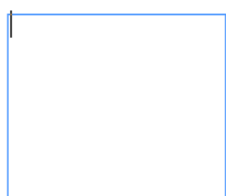

4. Open / create your inDesign document.
5. Use the Type Tool to create a new text frame for the QR code

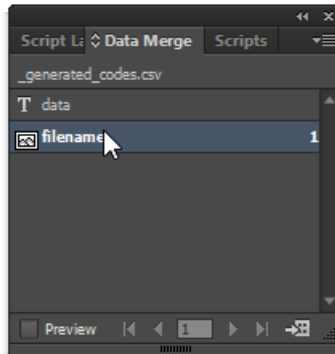

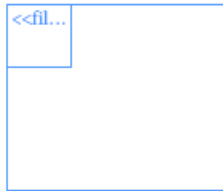

6. Open Data Merge window using the Window->Utilities menu (Window->Automation in CS2)

7. Select the menu icon in the Data Merge window and click on "Select Data Source"

8. Select the `_generated_codes.csv` file then select the `filename` option

9. Click on the Preview checkbox to check the QR codes
